

Lösungshilfe 1

AJAX für Netzwerkanfragen in JavaScript
mittels **fetch()-Methode**

<https://t1p.de/r9wc7>

Code

```
async function getCatFact() {  
  let url = 'https://catfact.ninja/fact';  
  const response =         (url, {  
    method: 'GET',  
    headers: {  
      'Content-Type': 'application/json;charset=utf-8',  
    },  
  });  
  const data =         response.        ();  
  return data;  
}
```
